

GLOBEX EVACUATION CHAIR

ARE YOU PREPARED ?

The GLOBEX evacuation chair is a cost effective method of ensuring the safe evacuation of non-ambulant users of the upper or lower levels of buildings in the event of an emergency or when lifts can not be used due to maintenance or a power failure.

Legislation in many countries and good management practice should ensure that anyone permitted entry into a building is safely evacuated in the event of an emergency without the assistance of the Emergency Services.

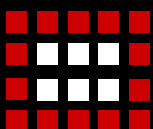

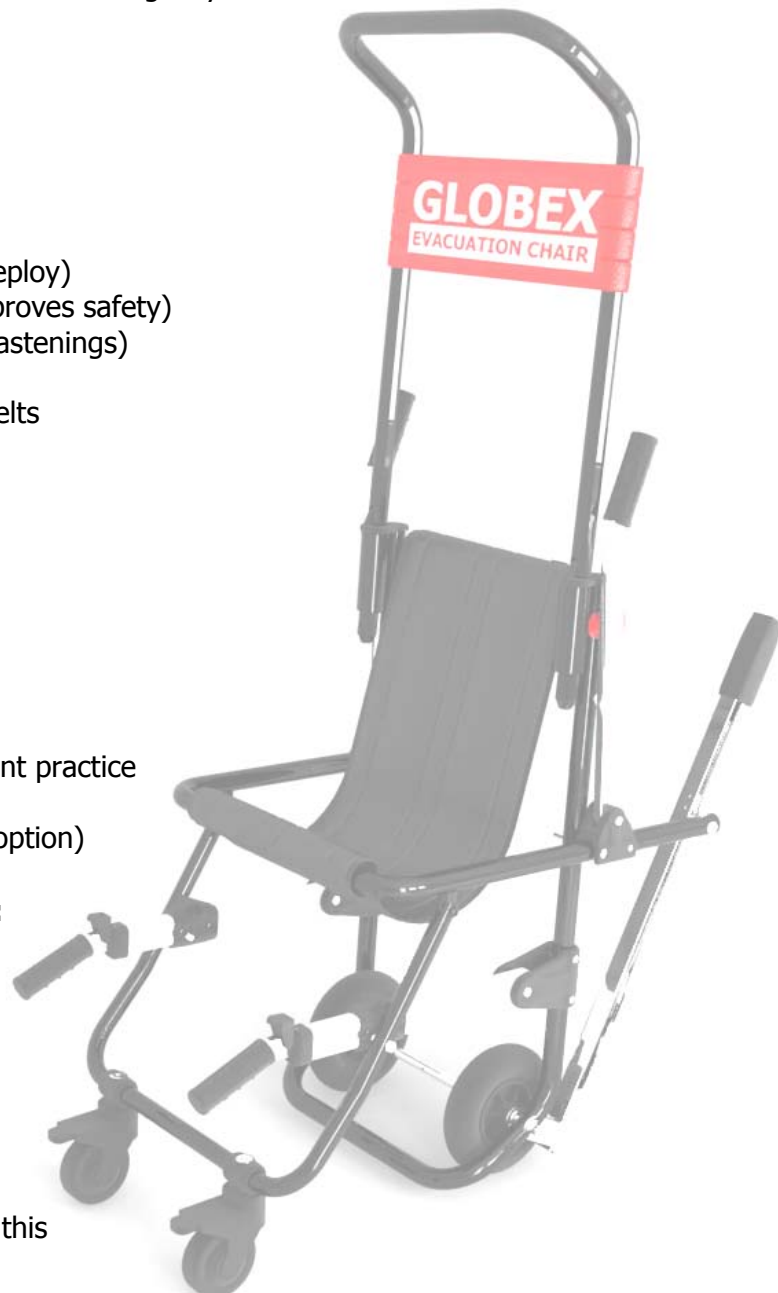

Advantages of the **GLOBEX** evacuation chair:

- Easily operated by one person
- Minimal training required
- Ready to use in seconds
- Four fixed wheels (no secondary wheels to deploy)
- No need to balance the chair at landings (improves safety)
- Simple deployment (no complicated clips or fastenings)
- Sturdy yet lightweight design
- Descent is controlled by continuous friction belts
- Safety brakes on wheels
- Adjustable headrest
- Adjustable seat
- Medical Devices Agency approved
- CE marked
- Width: 550mm
- Maximum load weight: 150kg
- Free standing option
- Cover and wall bracket available
- Assists with compliance and good management practice
- Only two models to reduce confusion
(down stairs only or down stairs and a carry option)

Advantages of using **Total Protection Services**:

- Free demonstrations
- Immediate delivery from stock
